Summary

Dedicated Web Developer with over 3 years of experience qualified in creating flexible web applications and responsive web designs using **Next.js**, **React**, and **Javascript**, with a major focus on clean code standards, creating accessible user interfaces, and improving web application performance.

Professional Experience

Front End Web Developer — Dec 2024 – Jul 2025
Feiwin Corporation — (Remote), Philippines

- Developed and maintained web applications using Vanilla JavaScript and Next.js.
- Refactored existing code to improve readability, maintainability, and performance.
- Designed and implemented CSS styles to enhance UI quality and UX.
- Refactored existing code to improve readability, maintainability, and performance.

Frontend Developer — Apr 2024 – Aug 2024
WBridges Manpower Corp. — Pasay City, Philippines

- Fixed styling and logic bugs across components to enhance stability and UX.
- Managed deployments across production and staging environments with minimal downtime.
- Collaborated with front-end, back-end, and UI teams to deliver unified features.
- Developed scalable, maintainable web applications using TypeScript and Next.js.
- Refactored legacy code to boost performance, reduce technical debt, and lower load times.
- Migrated critical withdrawal and deposit components from React.js to Next.js 14.
- Managed WordPress content execution and SEO optimization to drive organic traffic growth.

Next.js Developer (Project-based) — Nov 2023 – Dec 2023
Global Mint — (Remote) Makati City, Philippines

- Engaged in a short-term project, efficiently delivering results within a limited timeframe.
- Collaborated with a former colleague to build frontend applications using Next.js.
- Styled responsive, cohesive user interfaces using Tailwind CSS.
- Integrated Ant Design components to support advanced statistical data visualization.
- Communicated project progress, technical requirements, and blockers across the team.

Frontend Developer — May 2022 – Apr 2024
Dynamic Strategy Solutions Experts — Pasay City, Philippines

- Built web and mobile browser compatibility project templates to ensure cross-platform coverage.
- Resolved intermediate to complex software bugs to improve system stability.
- Developed scalable, maintainable web applications using TypeScript and React.
- Optimized code for better readability and maintainability.
- Used Gerrit for version control and collaborative code reviews.
- Partnered with Product Design to validate Figma mockups and QA to verify bugs.
- Used Mango for cross-department communication, alongside Jira and Scrum for project tracking and workflow management.
